Available in packs of 10.

Floor Disc Escape Route Markers in normal lighting conditions

Utilising the latest manufacturing technology Jalite is proud to announce the new floor mounted escape route disc markers.

Ideally suited to compliment and reinforce existing egress systems. Suitable for concrete or vinyl flooring and comes with self adhesive backing.

With growing concerns about global warming, cutting your carbon footprint is in the forefront of everyone's mind. Photoluminescent products promote energy saving technology as photoluminescence does not consume electrical energy, simply energising from in situ lighting.

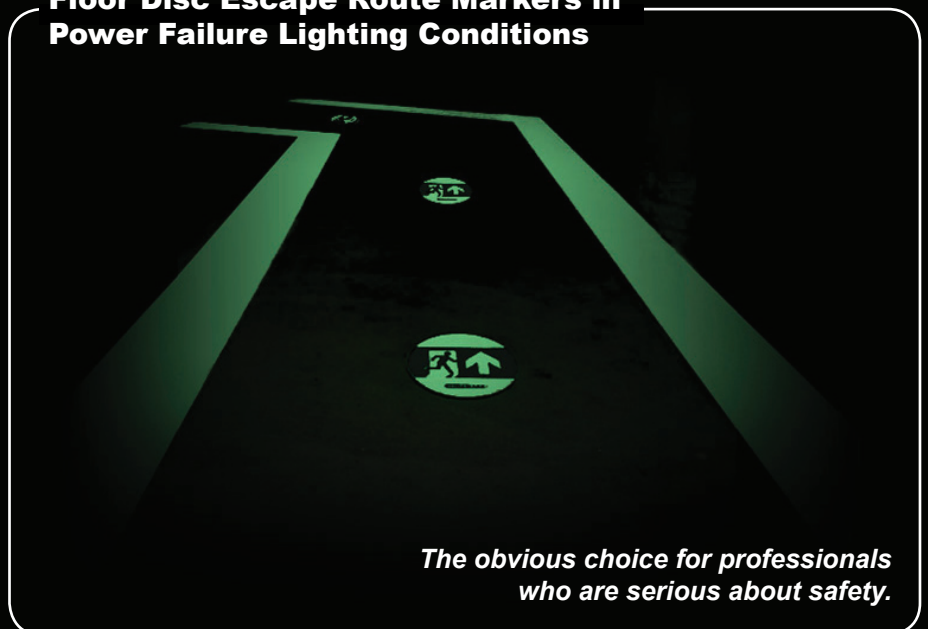

Providing clear concise egress instructions in normal & emergency power failure lighting conditions.

BS ISO 16069: 2004 endorses the use of floor mounted egress signs integrated in to the the means of escape system.

Using the latest photoluminescent technology the disc markers provides excellent durability and comprehensibility characteristics.

Easy installation - Simply remove backing material and place the marker in the desired position, apply firm pressure, done!

Floor Disc Escape Route Markers in Power Failure Lighting Conditions

The obvious choice for professionals who are serious about safety.
